Labour In Power 1964 70

The Labour Governments 1964-70, Volume 1 - Oct 14 2021
This book is the first in the new series The Labour governments, 1964-70 and concentrates on Britain’s domestic policy during Harold Wilson's tenure as Prime Minister. The book deals, in particular, with how the Labour government and Labour party as a whole tried to come to terms with the 1960s cultural revolution. It is grounded in original research, takes unique account of responses from Labour's grass roots and from Wilson's ministerial colleagues, and constructs a total history of the party at this critical moment in history. Steven Fielding situates Labour in its wider cultural context and focuses on how the party approached issues such as the apparent transformation of the class structure, the changing place of women, rising black immigration, the widening generation gap and increasing calls for direct participation in politics. Britain's Policy Towards the European Community - May 21 2022

The Official History of the UK Strategic Nuclear Deterrent - Jul 31 2020
Volume II of The Official History of the UK Strategic Nuclear Deterrent provides an authoritative and in-depth examination of the British government’s strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the Polaris programme, Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour’s defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations. The Wilson Governments, 1964-1970 - Jul 23 2022
This book provides a fascinating re-assessment of our view of the Wilson governments of 1964-1970. This new text draws on newly available sources, across the range of British government, and for the first time looks at the whole range of political and state activity. This critical appraisal provides a fascinating case study of British
government in action in this key period of British History. This book was previously published as a special issue of the leading journal Contemporary British History. It is an excellent resource for students of governance, foreign policy, economics and social policy. **The Labour Governments 1964-1970** - Apr 19 2022

This book is the second in the three volume set The Labour Governments 1964-1970 and concentrates on Britain's international policy under the Labour governments in the 1960s and is available for the first time in paperback. The coverage ranges from defence policy and the government machine to European integration, NATO and the Vietnam war. Harold Wilson and his ministers have often been accused of betraying the sense of promise that greeted their victory in 1964. Using recently released archival evidence, John Young argues that a more balanced view of the government will recognise the real difficulties that surrounded decision-making, not only on Vietnam, but also on Aden, the Nigerian civil war and Rhodesia. Economic weakness, waning military strength, Cold War tensions and the need to placate allies all placed limits on what a once-great but now clearly declining power could achieve. Furthermore, the government proved of pivotal importance in the history of Britain's international role, in that it presided over a major shift from positions East of Suez to a focus on European concerns, a focus that has remained until the present day. The book will be of vital importance to students of British history and international relations during this exciting period. Together with the other books in the series, on domestic policy and economic policy, it provides a complete picture of the development of Britain under the premiership of Harold Wilson. **White Heat** - May 28 2020

Harold Wilson's famous reference to 'white heat' captured the optimistic spirit of a society in the midst of breathtaking change. From the gaudy pleasures of Swinging London to the tragic bloodshed in Northern Ireland, from the intrigues of Westminster to the drama of the World Cup, British life seemed to have taken on a dramatic new momentum. The memories, images and colourful personalities of those heady times still resonate today: mop-tops and mini-skirts, strikes and demonstrations, Carnaby Street and Kings Road, Harold Wilson and Edward Heath, Mary Quant and Jean Shrimpton, Enoch Powell and Mary Whitehouse, Marianne Faithfull and Mick Jagger. In this wonderfully rich and readable historical narrative, Dominic Sandbrook looks behind the myths of the Swinging Sixties to unearth the contradictions of a society caught between optimism and decline. **The Labour Governments 1964-1970 and the Other Equalities** - Nov 02 2020

Politics and Economic Policy in the UK Since 1964 - Jul 11 2021
Politics and Economic Policy in the UK since 1964: The Jekyll and Hyde Years examines the economic policies that have been pursued by successive governments in Britain since 1964 and how such policies have been influenced by two sets of factors: politics and Keynesian demand management. The two basic failures of British economic policy since 1964 are highlighted, namely, the failure to establish a workable long-term incomes policy and the failure to achieve a high and stable rate of industrial investment. This book is comprised of seven chapters and begins with a background on the British economy until 1964, with emphasis on the economic problems faced by the country, including rising prices. The four basic objectives of economic policy to which both Labor and Conservative parties subscribe—full employment, a reasonably rapid growth rate, stable prices, and a satisfactory balance of payments—are discussed. The next chapter focuses on the Labor Party's 1964 Election Manifesto and how the economy fared from October 1964 to March 1966. Subsequent chapters evaluate the economic policies of the Labour government during the period April 1966-June 1970, including devaluation and incomes policy; economic policies adopted by the Conservative government from June 1970 to February 1974; and the country's economic situation since February 1974. The final chapter considers four factors—structural, technical, managerial, and political—that were responsible for much of what went wrong with the British economy since 1964. This monograph will be of interest to economists, political scientists, politicians, and economic policymakers. Twentieth-Century Britain - Jun 29 2020

Review: "Harold Wilson's Cold War analyses the Labour government's efforts to promote East-West detente and to improve Anglo-Soviet relations from 1964 to 1970." "Geraint Hughes challenges the caricature of Harold Wilson's rigid subservience to America, and shows how, as Prime Minister, he proposed to develop closer contacts with the Soviet leadership, and to foster co-operation on arms control, conflict resolution in Vietnam, and East-West trade."--Jacket. The Labour Party and Constitutional Reform - Aug 12 2021

Examines the Labour Party's approach to constitutional reforms in historical context, and how these have been pursued more to 'modernize' political institutions, rather than radically transform them. Explains the reasons for this constitutional conservatism, and the debates which specific reform proposals have prompted in the Party. Summaries of Important Labour Judgements - Aug 31 2020

Available in paperback for the first time, this book is the third in the three volume set *The Labour governments 1964-1970* and concentrates on Britain's economic policy under the Labour governments in the 1960s. It assesses the origins, development and outcomes of the attempts made by the 1964-1970 Labour governments under Harold Wilson to modernise the British economy. This is the first comprehensive and archivally-based work to offer a detailed study of this modernisation project. The book places the project in the context of Labour's economic ideas as they had developed since the 1940s as well as the economic legacy they inherited from the previous thirteen years of Conservative rule. After outlining this context and providing a summary narrative of economic policy over this period, the international aspect of Labour's approach to the economy is analyzed. The core of the book then goes on to look in detail at the policies directly concerned with modernization. Following the agenda set by the national plan of 1965, policies on planning, investment and the firm, technical change, the labor market and the nationalized industries are all analyzed. In addition, the productivity campaign of the late 1960s is shown to have encapsulated many of the underlying ideas but also many of the problems of Labour's approach to economic policy. The final section of the book asks how the pursuit of modernisation affected Labour's pursuit of "social justice," before offering an overall assessment of Labour's period of office. The book will be of special interest to contemporary historians, economic historians and those interested in the history of the Labour party. Together with the other books in the series, on domestic policy and international policy, it provides a complete picture of the development of Britain under the premiership of Harold Wilson. This year marks the centenary of Harold Wilson’s birth, the fiftieth anniversary of his most impressive general election victory and forty years since his dramatic resignation as Prime Minister. He was one of the longest-serving premiers of the twentieth century, having won a staggering four general elections, yet, despite this monumental record, his place in Labour's history remains somewhat ambiguous. By the end of his two periods in power, both the left and right of the party were highly critical of Wilson - the former regarding him as a traitor to socialism, the latter as contributing directly to British decline. With contributions from leading experts in the fields of political study, and from Wilson's own contemporaries, this remarkable new study offers a timely and wide-ranging reappraisal of one of the giants of twentieth-century politics, examining the context within which he operated, his approach to leadership and responses to changing social and economic norms, the successes and failure of his policies, and how he was viewed by peers from across the political spectrum. Finally, it examines the overall impact of Harold Wilson on the development of British politics.
