The Death Of the Playground - Mar 17 2023
The Death Of The Playground talks about the tragic loss of 'Free-Play' in America. Our Public Playgrounds were the places where it all happened, where developing boys could learn together to: First sit and watch and learn from those older: Truly become an important part of a group and fit in: Make up their own games and improvise: That to have friends you must first be a friend: Handle disappointment and that life isn't always fair: Realize that all great things take time: To become part of something bigger than just themselves THIS ONE WAS MOST IMPORTANT!
On the Playground, they did all of this without DIRECT Parent or Adult supervision. They made up their own rules of play, picked their own games, decided for themselves what was fair, and learned to live with the consequences. All of this doesn’t mean Parents weren't involved; they were. They just weren't over-involved! Kids raised with their parents doing everything for them, then 'grow up' and want their government to do the same thing. I think we all know where that road leads. America’s Corporations desperately need the developing titans, like the ones that fought and won two World Wars, created the powerful multi-national corporations, and wrote the great books of the 20th century. The chain connecting boyhood to manhood is now broken. Let me take you back to find the missing link. Revisit with me the Playground of my childhood, and share with me the pure joy and magic of my 8 years of 'Free-Play.' It’s not too late to recapture that magic for our children, but we have to act and we have to act soon. The Playground Book - Nov 01 2021

From the FOREWORD. The main motive in the preparation of this book is to present a fairly limited choice of the very best games and dances adapted to playground conditions and purposes in order that any novice just beginning his or her playground work may with confidence refer to them for help and inspiration. The playground is essentially a place for play. Play is recreation. Play gives health to the body and joy to the soul. Whoever has not tasted the pleasures of youth’s playgrounds has missed much of the sweetness of life. That which brings together the group for restful, relaxing, re-creative, vigorous, social, joyous activity, is an uplifting force of incalculable value. That which makes us laugh with unbounded joyousness and fills the heart with unselfish love helps to lubricate the wheels of altruism. A good game, a lively exhilarating dance, a sweet, simple song-play, a spirited race, - all these help to enhance the joy of living. The writer, in submitting this collection of ten of the best in five separate playground activities, does so with a feeling of confidence that, given the opportunity, children will play these games and perform these dances with a wholesome joyousness that will amply repay any instructor who has taken the trouble to teach them.

Bullies, Revised - Jul 09 2022

Emotionally disturbing yet cathartic, this groundbreaking book by two leading experts in the field of community intervention, anger and addiction, provides a compelling expose on all aspects of bullying. Using in-depth case studies of bullies and those they bullied, Middleton-Moz and Zawadski provide a true look at the problem and what can be done to stop it. Focusing on environments where bullying occurs most frequently—in schools, homes, relationships, workplaces and cyberspace—the authors identify six bullying strategies that encourage bullying behavior and provide concrete ways to defuse tense or potentially hazardous situations. Equally important, Middleton-Moz and Zawadski explain how to reach out to bullies with the appropriate guidance and support, without which bullies will only continue to create fear and anxiety in others. No matter how hard they try, it is virtually impossible for parents to keep up with all the apps and technological changes that enable bullying to remain anonymous. To help them, the authors have included a chapter just for parents on how to monitor their children’s behavior and online interactions to keep them grounded. For both parents and educators, Middleton-Moz and Zawadski also explore innovative anti-bullying programs and offer advice about which ones are really working.

This book offers a rich and detailed empirical account of children's play and interaction in the
school playground. Drawing on the approaches of ethnomethodology and conversation analysis, 'Talk and Social Interaction in the Playground' examines the organisation of membership and social action in a game created by a group of children. It offers rich insights into the methods and practices used by children to produce play and social order, making a significant and substantial contribution to the study of talk-in-interaction, as well as to studies of children's play, competencies, and social interaction. The book demonstrates the importance of putting aside preconceived assumptions about how children talk and interact in order to reveal the situated methods and practices that children use - not because they are children, but because they are social beings. As well as appealing to scholars of ethnomethodology and conversation analysis, 'Talk and Social Interaction in the Playground' will be of interest to students and researchers in a range of disciplines, including child studies, developmental psychology, education, applied linguistics, and sociology. Climbing frames, arches, igloos, tumbling bars, jumping stones, and climbing walls all found their way into unsightly wastelands and boring squares thanks to the visionary help of architect Aldo van Eyck, who transformed urban spaces in Amsterdam into more than 700 playgrounds between 1947 and 1978. Beyond the sites' spatial designs, van Eyck also developed a whole series of sandpits, climbing frames, and other equipment in his radical, charming recreation of the city into a space for play. This book considers the importance of
the playground in general and more specifically within the international postwar developments in city planning. Van Eyck's sources of inspiration, from Kurt Schwitters to Jacoba Mulder, are surveyed. The playgrounds themselves are examined on the basis of how they were received at the time of construction, through letters from neighborhood residents, memoranda by public officials, and the reactions of contemporary architects. A separate essay traces what happened to the playgrounds after 1978, and how van Eyck's ideas resonate in the design practices and spatial planning policy of today. At the Playground - Apr 25 2021

Children's Games in the New Media Age - Jun 08 2022
The result of a unique research project exploring the relationship between children's vernacular play cultures and their media-based play, this collection challenges two popular misconceptions about children's play: that it is depleted or even dying out and that it is threatened by contemporary media such as television and computer games. A key element in the research was the digitization and analysis of Iona and Peter Opie's sound recordings of children's playground and street games from the 1970s and 1980s. This framed and enabled the research team's studies both of the Opies' documents of mid-twentieth-century play culture and, through a two-year ethnographic study of play and games in two primary school playgrounds, contemporary children's play cultures. In addition the research included the use of a prototype computer game to capture playground games and the making of a documentary film. Drawing on this extraordinary data set, the volume poses three questions: What do these hitherto unseen sources reveal about the games, songs and rhymes the Opies and others collected in the mid-twentieth century? What has happened to these vernacular forms? How are the forms of vernacular play that are transmitted in playgrounds, homes and streets transfigured in the new media age? In addressing these questions, the contributors reflect on the changing face of childhood in the twenty-first century - in relation to questions of gender and power and with attention to the children's own participation in producing the ethnographic record of their lives. It shows how children learn and display in the playground a remarkably complex set of social skills and the study clearly demonstrates the importance of playtime for preparing a child to cope in the adult world.
